CREATIVITY IN TRANSPORT ENGINEERING

## A little about RedSquare.

REDSQUARE IS UNIQUE, OUR BRAND IS RED, AKA EYE-CATCHING

We believe in and offer a 'one-stop-shop' concept to optimise the customer service we deliver to our clients. Throughout the years, we have provided our clients with a team of creative, unique, and committed professionals to design and deliver solutions in the field of design and construction.

RedSquare's team consists of architects, engineers, and planners. Our traffic engineering and transport planning sector of the business provides a range of services in traffic engineering, transport planning, traffic management and data collection.

We assist from feasibility stages through to planning stages and ultimately with the delivery. Starting from feasibility assessments for carparks, subdivisions, mixed-used or commercial developments; we assist through to planning permit stage where our expertise in traffic engineering and impact assessments comes in handy. In the delivery, we provide assistance with our tactical traffic management plans and road safety audits.

## TRAFFIC ENGINEERS | TRANSPORT PLANNERS

# A little bit more.

### OUR CLIENTS | OUR CULTURE | OUR STRATEGY

Our clients are property developers, architects, town planners and land developers in the private sector and local governments in the public sector.

Based in Melbourne, but we provide services all across Australia with a strong client base in Victoria and New South Wales. We are rapidly expanding in other areas of Australia.

Our organisational culture is based on support. We support our clients, our staff and our community. We believe that we all live with a common goal of making the world a better place for all of us.

Our strategy is to demonstrate excellence through the services we offer. Time and time again we have proved our excellence.
